Comments: It would be nice to have Sweetwater Lake designated as non-motorized. There are few places remaining where one can canoe, SUP or float tube in relative quiet or safety. If motors are allowed the Lake, given it's relatively small size, will be overrun with power boats and their resultant wakes, noise, usual disregard for those non-motorized. It would also be nice if the lake were a stocking priority for the CPW so it could be utilized as a scenic place where young people could be introduced to fishing and have success. Given the current trails and new ones that would be developed it would be nice to have some restricted to foot or horseback. It is also hard to find anywhere to hike when one isn't going to be in competition with trail bikes and now electric bikes. Hiking and biking aren't compatible on a trail. Everyone needs access, but I would think there would be ways to facilitate different uses.

Thank you
