Title:
Comments: We had devastating forest fires in our neighborhood in 2014 and 2015, we also had three firefighters perished while protecting people's houses.
It is very important that we take all reasonable measures to prevent these devastating out-of-control fires in the future. These fires bring death to people, plants, animals and environment. A look at hills with no living trees is depressing. I do not advocate clear cuts but how is a hill denuded by a fire better than a clearcut? The soil is disturbed and it might take decades to return it to a more natural life-giving state.
It is important to set the parameters of logging and transportation for the project and follow and monitor the guidance. But concerns about noise and trucking should not prevent the forest Service to implement the project.
