Comments: The last thing the forest service needs to do is shut down even more recreational and off roading opportunities. You've already overstepped your authority by closing access points into the Cinnabar mine and destroying the Dewey mine. We don't have a lot of trails to ride in this area of Valley County as it is because you took out all the logging roads around Paradise Valley and you don't maintain Cabin Creek Road at all. What does limiting dispersed camping do to help? All you're going to do is fill up already bursting camp grounds so the government can milk out a little more money from the hardworking middle class.
