Comments: I strongly support South 32's request.

I have lived in Arizona since 1956, grew up hiking our mountains, deserts and valleys, including the Patagonia Mountains where the South 32 mine is located, love and greatly value our natural resources. I am also a retired Corporate High-Tech Manufacturing Director.

South 32 policy/practices support environmentally responsible mining processes and most of the mining occurs underground.

These minerals are critically required to support Domestic High technology Manufacturing in Arizona (American Battery Company; KORE Power; Intel; TSMC, etc.) and USA, providing great and diverse value to AZ & USA, independence from control of our economy by other Countries in a manner that optimizes ESG standards.

Please quickly approve South 32 requests.
