Title:
Comments: I would like to register my support of the Midnight Restoration Project in certain aspects:
*The thinning of small-diameter trees, paired with prescribed burning to restore historic forest structure.
*Scheduling thinning during winter months to prevent soil damage and erosion.
*The decommissioning of 52 miles of road within the project area to improve the condition of the watershed.

However, I would also like to register my opposition to
* Overly broad allowance for the cutting of large trees between 21" and 25" in diameter. Please preserve these!
*Logging on steep slopes.
*The creation of unnatural and unnecessary fuel breaks.

Thank you for your consideration!
