Title:

Comments: I would like to register my support of the Midnight Restoration Project in certain aspects:

- *The thinning of small-diameter trees, paired with prescribed burning to restore historic forest structure.
- *Scheduling thinning during winter months to prevent soil damage and erosion.
- *The decommissioning of 52 miles of road within the project area to improve the condition of the watershed.

However, I would also like to register my opposition to

- * Overly broad allowance for the cutting of large trees between 21" and 25" in diameter. Please preserve these!
- *Logging on steep slopes.
- *The creation of unnatural and unnecessary fuel breaks.

Thank you for your consideration!
