Comments: It was with great joy that I read about the on mountain improvements planned for WP. However it. Is with great sadness I saw no mention of the problem WP has with an off mountain situation and that is the problem WP has with parking! WP has some of the worse parking of any resort in the state! I have personally at times arrived at the G lot at 9:45 am only to be told the lot is full and the only parking left is in town despite the parking app indicating there was parking available. WP may have expanded the G lot but I don't think by enough to make up for parking loss of the H lot to expanded employee housing and need for those employees to park in the G lot full time and the loss of the of the other lot to the new fire department construction. How can you plan on expanding and improving the on mountain product with the prospect of attracting many more visitors without adding a single new parking spot to an already hugely insufficient parking situation? Where are all those new guests (and us) going to park?
