Comments: Having spent a lot of time in this area, I am heartbroken to learn of "midnight restoration project". I am not sure how clearcut logging and restoration can be used together in a title. Please take more time to consider the consequences of what this will do to both the eco-system and to recreation & tourism. I understand the concern for fire safety, especially after a dry Winter and the recent history of wildfires, yet I believe more consideration needs to go into looking at consequences and planning accordingly.

Please take more time to consider.
