Comments: I am very excited to see this project developed in the state of Arizona! I truly believe Hermosa is going to transform Santa Cruz County for generations by improving quality of life for residents and contributing tax revenue that will encourage additional and improved public services. South32 appears to be taking a proactive approach to environmental and social impacts, and transparency with the community has been fantastic. I have full confidence in South32's ability to responsibly extract these critical minerals, and I trust that the value of the minerals will be returned equitably to the local communities.
