Comments: I fully support the proposed project. These improvements are clearly within the scope of the current masterplan and are sorely needed. Infill and improved trails and lifts were requested from the public and USFS during the Peak 6 EIS and this is an obvious and effective solution.

Once implemented, these will help to improve skier circulation, upgrade aging infrastructure and provide for a vastly improved experience.

I have complete confidence in both the resort and USFS to properly plan and implement all proposed improvements.

I'd like to see significant clearing and widening of the Upper and Lower American/Gold King and Shock trails to provide additional acreage.

Kudos to Vail Resorts for proposing these improvements!
