Comments: This is a much needed improvement to the Breckenridge Ski Area. After having tried to teach our young grandchildren to ski for the first time at Breckenridge, we were stunned to realize how small and congested the existing limited learning area actually was. It was not at all safe, as everyone was so packed together, and the lines were a significant deterrent with small children. Furthermore, the C-Chair replacement will significantly improve the movement of skiers away from the Beaver Run base, also a major area of congestion, and in particular, moving the base and unload points of C-Chair will make the base safer for those going to Beaver Run, as well as get the access to the more difficult runs on the north face of Peak 9. This is a much needed improvement and my wife, 3 adult children and their spouses, and 5 grandchildren fully support this endeavor!
