Title:

Comments: Because this project upgrades the facilities within the current Breckenridge US Forest use permit, I fully support this project and its scope. My primary reasons for supporting this project area as follows:

PROPOSED GONDOLA- The proposed gondola will provide safer access to the beginner area on Peak 9 as beginner skiers often have difficulty using chair lifts. Also, the area to be served by the proposed gondola is a very popular area with very long lift lines on the Quicksilver chair which currently serves this beginner area.

PROPOSED C CHAIR REPLACEMENT- The replacement of C Chair is also definitely needed as the existing chairlift is very difficult to get on and creates a hazard for more novice and inexperienced skiers. Also, the existing C Chair is very old and slow and has frequent mechanical breakdowns.

I fully support this project and the proposed upgrades.
