Comments: I have one additional comment - the reservation system was changed a few years back and now does not allow permit pick up location to be changed. This needs to revert back to the old system. As it stands currently, you have 15 minutes to book a permit or it may disappear. Until I see what locations are available, I don't know if we'll be going in on via Orr, Ely, Grand Marais or Tofte. Thus we have to wait to make plans for travel and lodging which effect permit pick up location. It is impossible to know where we will pick up the permit when booking. It is a waste of the Forest Service time to have to do this administrative task which we can all do ourselves. Thank you for considering this!
