Title:

Comments: I'm writing this because I'm totally against the clearcutting (who fooling who - logging and making money on) 10,000 acres of Whitley and McCreary counties historic mountains. Yes, they are apart of our history! A history and nature you have no right to destroy. Besides ruining the beautiful scenery we get to see all seasons of the year it also will affect the environment in ways no one can fully imagine. Wildlife, water supplies, erosion, climate, the list goes on and on. Also the herbicides you'd have spray to maintain and continue to prevent invasive species - who's going take care of the health care bills for those who are damaged from that possibly getting in our water supply. ONE WOULD THINK THE US FOREST SERVICE WAS HERE TO PROTECT OUR FORESTS NOT WIPE IT OUT!
