First name: Josh
Last name: Thomson
Organization: Okanogan County Public Works
Title: P.W. Director / County Engineer
Comments: Okanogan County Public Works is concerned about localized traffic impacts to county roads from the proposed operations. These impacts can be especially significant on our unpaved county roads. We are concerned about accelerate degradation of the road surface, loss of road materials from dust, and the impacts of dust on residents. We request that each project location be assessed for potential impact on the roads, and employ methods to reduce impacts. These solutions could include watering the unpaved roads for shorter duration activities, stabilizer materials for longer duration, or possibly BST for long duration corridors.

I support your efforts to mitigate fire danger and impacts to our community.
