Comments: I'm glad to see the Alternative 1 option for our area--I appreciate that you've listened to those of us who live in this area and these mountains. For years, people and corporations have depleted resources and forever altered the Appalachian landscape. Just because those of us who live in this area are poor doesn't mean we don't care about our surroundings or accept harm to it. I think the option a good compromise between what the Forest Service wants and what the people want. I hope you'll move forward with the alternative option.
