Comments: I think a fantastic idea. Chair C has needed to be replaced for years, it's very slow and only 2 person capacity. The sawmill catwalk below chair C discourages traffic to beaver run area because it is very flat and slow. More people can take a revamped C chair up and this would also bring more business to the overlook at the top of C chair. Not to mention the trails under C chair are sorely under skid currently. The peak 9 gondola is also a fantastic idea, would help cut down on the peak 8 gondola traffic.
