Comments: This project is long over due and I am in total support of it! It is very well thought out and will greatly reduce the congestion at the base of Peak 9. This is the main beginner area at Breckenridge and having a gondola to load beginners and move them quickly from the base will enhance the efficiency of the quick silver lift which is stopped frequently due to beginners falling when getting on or off the chair. This is very similar to the project at Jackson Hole Mountain Resort. That project greatly enhanced the skiers experience. I highly encourage you to approve this project.
