Comments: I Oppose this project and all commercial logging operations on Public Land. Restorations should be approached in a sustainable and ecological way. NO exceptions for cutting of large trees. NO new Roads. NO extra cutting on STEEP SLOPES. The Logging done in the Loup Loup and Buttermilk Creek areas has been excessive and destructive. The proposed heavy logging will only increase wind velocity, making fires burn faster and hotter. We need to approach this differently. Stop handing money to commercial logging operations and do this right.
