Title:

Comments: We are owners of property on the Canadian side of Lake Saganaga. We have been enjoying the BWCAW for 39 years. Our property is only accessible but motorized boat and we expect the Congressional Laws in place will continue to preserve those rights. The BWCAW is for ALL people to enjoy in a variety of capacities. Not everyone who wants to enjoy this wilderness can do so without support of a motor or a tow boat. The tow boat operators play an integral part to accessing the BWCAW. The tow boat operators also add a service to homeowners on the Canadian side of Lake Saganaga for those who need assistance. We hope that when making your assessments on towboats, permits and motor use, you will assess each on their geographic/lake and not the BWCAW as a whole. The tow boat outfitters are young owners building business and families in communities who also benefit from their business services. These towboat operators are usually first to call in medical emergencies and safety concerns from boaters and campers.
