Comments: Alternative 1 is better. Keeping more of the trees is better. I know we make houses and pencils and furniture out of trees but we need to keep the older ones. To cut down so many and all of them in a clearcut in one area is not right. The plan with 40 years is too long and 10,000 acres is too much. That's too much and wrong to do to the trees and the people who live there. We need a little of both and Alternative 1 does that.

My husband Jim who died would have thought clear cutting those mountains is not right. He loved fishing and fished in the ponds in that area. We ate those fish and spraying herbicides would have gotten into the fish we ate. We need to be careful with what we do to the Earth that God gave us and not destroy it for future generations.

I am for Alternative 1. I am strongly against the Proposed Action.
