Title:

Comments: I was raised on little wolf creek road and my mother still lives there. I visit her weekly. The beauty in that area is hands down some of the most beautiful forests that we have in Kentucky. The potential harm and safety that this project can bring to this area makes me so disappointed that in this day and age this would even be brought up as an option. Shame on you all. We can do better and should do better for the people in these communities and their voices should be heard.
