Comments: Hello and thanks for your time reading this today. I just wanted to say that I hope that you would consider to leave the trees that we have in our community alone unless they are actually diseased. It takes too much time to be able to grow trees that benefit our environment, and these ones seem to be healthy and thriving and a blessing to our community. I hope you take the signatures of all the people in their families who have taken the time to be able to support this cause and utilize other land projects that you see necessary .
