Comments: Breck has fallen into the too much development pit. More skiers, less parking, impossible to get around - perhaps Vail Assoc. should address the real problems with Breck. Too crowded/too much chaos/too expensive. How would this help versus make that ALL worse. Out of control development is the real problem. It's all about money, money, money with these people. Most normal folks can't even afford a trip to Breck or lift ticket prices. Millionaires, billionaires are driving most of these decisions. As 90% is on Forest Service lands those resources should be improved for all of us, not just those that can afford a $5,000 a week vacation for two. This is exactly what is wrong with Forest Service policy these days. Hell, we can't even get a reservation to camp in Forest Service campgrounds anymore. Cabin rental prices have gone up 300% since Reservation.gov took over the system: it's not about the forest anymore it's about $$$$$$$$$$$$$$. Ridiculous that the public forest is only about the money it can generate now.
