Comments: I am writing this letter to oppose the Jellico Vegetation Management Project #63037. I would like for this project to be stopped. More and more of our country's beautiful forests and nature have been destroyed to accommodate man and new plans for this and that, but when will it ever be enough? Please do not do this. There must be another way. If not and it must happen, please reevaluate the amount of vegetation and forest that must be logged and destroyed. It takes each and every one of us to do our part in protecting and preserving some of the amazing beauty and refuge these amazing woods provide for not only humans but the numerous living creatures and organisms that inhabit this area.

Respectfully,

A concerned citizen
