Comments: I don't agree with the Proposed Action at all. I want alternative 2 where you do nothing to the forest. This forest can maintain it's own health, and it does not need any help from people at all. The destruction that you will bring to the area will be devastating to say the least. You will impact the land, the plants, and all of the wildlife there. You can cause such a negative impact on the area by increasing the risks for landslides and floods. Please don't touch our National Forest! You can log in commercial logging areas...don't be doing it in our National Forest! Thank you for listening.
