Comments: I am for Alternative #2. I believe we can get by in the logging industry without using this area of the national forest. The logging will tear up vegetation and erode steep slopes. Animal life will be displaced and runoff water will arrive in the Cumberland River, affecting fish and the ecosystem for years to come ...long after the project is done. It's a hard no for all options from me and my family. I moved here from Owensboro for the beauty and do not want nor need this destruction to this part of beautiful Kentucky. Thank you!
