Comments: I do not support this project. Private land that's being logged now is a terrible eyesore for the community that lasts years and sometimes decades. Drive through Whitley county's countryside and what's the worst looking thing you see other than poverty? Deforestation hands down. Our streams and rivers have enough erosion washed into them as it is with private land being logged. Muddier rivers are not something I want to enjoy this summer and I'm sure most locals would agree.
