Comments: I am against the logging on Jellico mountain. You are taking down thousands of acres where wildlife lives. Not only are you taking acres away from them, but the habitat of the protected species, the pileated woodpecker. People reside on Jellico and Ryans Creek for the mountainous view, the peace & quite, the secluded. By logging, you are taking that away from residents who have resided in this area for the last 80+ years. Please reconsider and leave the forest alone.
