Comments: Attention Jellico Vegetation Management EA

Please hear the people of this great nation and save our nation forests for our children and grandchildren and grandchildren's children to enjoy as we have had the privilege to do. I am opposed to the 40 year project!! Please consider Alternative 2 for the sake of our precious forests and communities. We only get one life on this earth and need to protect it for the future generations to come. There has to be a better option than to wipe it out, with all the natural disasters that have occurred just in my lifetime I beg of you to stop this project from happening!! The people that enjoy the forest and the animals that dwell in them need to be protected. We don't want to live in a concrete world !
