Comments: To whom it may concern:

I am a native Kentuckian writing to express my opposition to the proposed Jellico Vegetation Management EA. While I do not reside in the affected area, I have friends and extended family that will be affected by this proposed action. In addition to those people affected, I am concerned for what this will do to the species of elk, deer, bears, and countless other creatures that reside in the area. The beauty of this part of eastern Kentucky is unmatched-please leave it be, and preserve the wooded areas that people and animals alike call home.
