First name: Nick

Last name: Gabbard

Organization:

Title:

Comments: I oppose this project in its entirety for numerous reasons. The terrain in those areas is steep and roads are narrow. Heavy equipment movement and transport in that area would be treacherous, not to mention related traffic and wear and tear on surrounding roads and highways due to the trucking of the logs.

Additionally, this area has historically been used as recreational activity areas for a large group of hikers and offroad enthusiasts, which I believe serves a far greater public good.
