Comments: My questions with all of this is

#1 What is the purpose of the logging?

#2 Is the lumber being sold? And if so too whom?

And where is the profits going? (Profits should go to surrounding communities to rebuild infrastructure and better funding for our schools and recreation)

#3 are roads of access (county roads) to these logging sites going to be properly built and maintained? Or will our already neglected roads just be destroyed even more?

I'm not necessarily against the logging project nor am I supporting it but with all things there are pros and cons and we really need to weigh them all out because if they are logging just to piss the profits into the wind and send them to another country as "funding" or to provide food and shelter for poor ol Pedro and his 12 illegal family members than I am completely against it. We help enough people this is our home we should be the ones getting the funding...period.
