First name: Timi

Last name: Reedy

Organization: Appalachia-Science in the Public Interest

Title: Board President

Comments: I am strongly opposed to the Jellico Vegetation Project #63037. The research has already been done and presented, this is not the time on planet earth to proceed with this project..

At this point preservation of habitat is key and supersedes all other interest.

Scientific data points to preservation and listen to the science and the law at this point.

Now is not the time.

I hope whoever read this has a blessed day!
