Comments: Reason why I don't want the logging people to ruin the forest

? First I don't want them to do it because there is no point to it and they are just killing the plants and animals and there are bald eagles and they are endangered

? Second because we like to swim in the creek and we can't because they are gonna put poison in from their vehicle's.

Third because we like to see the beauty on the trees and all the flowers and animals. we saw like 10 deer and we like to see them. a few years ago this person cut down everything in this one spot and it still hasn't grown back and even though it's one spot it still ruined.

My name is Lynnie Moses I am 13 years old I live in the Jellico creek area and I commented about this two years ago and I feel even more strongly about it now.
