Comments: I object to the proposed action. I would prefer alternative 2 (no cutting).

The myopic clearcutting plan proposed is in direct violation of the Forest Service's overriding objective. Logging can be one use, but it is far from even the most important part of a protected forest. If one must log, it should be limited and well managed. I am not opposed to logging, but the proposal and defense of the proposal damaged my trust that it will be done responsibly.
