Comments: As a resident of the county who enjoys visiting this area, I would be devastated to lose the natural beauty of the standing timber in the national forest. My children love going to visit and seeing the wildlife in the area and taking that away from them is devastating. I want my children and grandchildren to be able to enjoy the national forest that I have grown up with and clear cutting a massive amount of the forest would deprive them of that. I urge you to reconsider taking so much natural beauty away from this area. It may benefit you, but it will cause so much harm in so many different ways to the residents of the area who love the forest.
