Comments: It's concerning that the Forest Service is placing the timber volume mandate above other critical forest needs like recreation, forest health, and water quality. By prioritizing timber targets, the agency risks undermining the overall well-being of our forests and the communities that rely on them. I grew up in this area riding four wheelers through trails and enjoying the wildlife in the area. I want to share these same experiences with my own children and grandchildren. A 40 year plan is absurd to put into place because it is impossible to know what the area will need in that amount of time. I urge you to reconsider this plan.
