Comments: I'm opposed to the clear cut logging of all of this because I do not think it helps the habitat of all the species. I'm okay with selective of cutting timber and controlled burns and cleaning up which I think is completely better option and route to go but not clear cutting that many acres it's destroying our beautiful mountains and only worsening the habitat and for the people that love our beautiful mountains because places I've hunted that have been clear cut have been nothing but a big mess and ruined and done no good just made things worse in my opinion so I'm completely opposed to this
