Title:

Comments: I object to the clear cutting of this land. You will destroy the life of the land, destroy the homes of wild animals that will have no where to go except in neighborhoods where people live. You will only produce jobs for a few years there will be no long term employment but there will be long term repercussions to the land that can never be brought back to its former beauty before you destroy it. Land that wasn't flood prone will become flood prone and in return destroy homes and lives of the people who live here. I wholeheartedly object to your plans of clear cutting!
