Comments: Take a walk through the streets of Gatlinburg TN on a rainy day and you'll see one reason I don't support logging off slopes and steep mountains. I despise deforestation for many reasons, wildlife displacement and habitat destruction being top among them especially with deer and turkeys population already on the decline in the very zones you are referring too. Not to mention the black bear population is just starting to thrive in this area. As a taxpayer and a hunting/fishing license and tag purchaser I hate to think my money aided in any way the rape and destruction of one of the most beautiful places on earth.
