Comments: I really hope you all reconsider logging this beautiful area which has documented old growth trees. This is such a special place that I've enjoyed for the last 30 years. I hate that the public has had to resort to heartfelt pleading. Based on previous experience, Sometimes this makes a difference, it seems that most of the time it doesn't. I really hope this time you all take seriously all the evidence and data that points to this not being a good idea, and is only going to benefit a few entities that are only concerned with short term gains.

Thank you.
