First name: Ann Michele

Last name: Bushong

Organization:

Title:

Comments: I am 100% opposed to the Jellico "Vegetation Management" Project. This would devastate the area and impact the endangered species. It would displace so many creatures that call the area home. Additionally, it will contribute to climate change. All of this is UNACCEPTABLE.

Have some respect for these old, old trees and the creatures that call this area home. Do what is right and protect the environment that God gave us. We are stewards of the planet. It is our duty and I will always fight for what is right.

Sincerely, Michele Bushong
