Comments: Have we learned nothing from the strip mining debacle from the early 1970's? The land is still trying to heal from where they destroyed valuable flora and fauna. My Dad, a WWII veteran, bought close to a hundred acres on 92E that had been strip mined and he wore out a bulldozer and a tractor reclaiming the property. Even with some reclaim laws the soil erosion and gully washes constantly needed work. We will lose more valuable herbs from what is finally coming back, not to mention the destruction of wildlife habitat and the beauty of our area. The Biden Administration is a ILLEGITIMATE regime which is going against our 1776 Constitution and FRAUD eviscerates all of their plans.
