Comments: As part of the NEPA process, it's essential to highlight my opposition to the Forest Service's indiscriminate cutting of older forests driven by volume-based timber targets. Older forests are vital for biodiversity, carbon sequestration, and habitat preservation.

All of the comments suggested I firmly stand behind. Please protect the land, trees, the living creatures that call this forest their home, instead. Destroying that which we also desperately need to offset the carbon imprint is irresponsible, and above all ignorant.
