Comments: I have lived on Little Wolf Creek for the better part of my life. This is my home. God blessed me to be able to see the beauty and quite of these mountains.

Your idea to log the better part of these mountains down to the bare soil with clearcutting will ruin it for the people who live here and for all Americans. We had such bad floods in 2022 and FEMA gave the people \$1.8 million dollars to fix our roads and houses. All of that flooding was not due to logging but at least some of it was made worse by logging done up Davenport Hollow. If you log even bigger tracts and take all the trees in a clear cut, it will just get worse. And how many trees do you have to cut down and sell to make up \$1.8 million dollars in flood relief and road repairs? It all comes down in our valleys and all that money comes from us who pay taxes. We pay for it all and we don't want any part of it.

Don't clear cut our mountains and take our trees and sell them and leave us with an even bigger mess. And to think you are planning on doing this for 40 years and never have to talk to us again about this? That is just not right.

I am for Alternative 2, do nothing.

Please think about us. Thank you for listening.
