Comments: A different approach needs to be made concerning the Jellico Vegetation Management Project. I am NOT against logging, it provides materials for building and income for the loggers. I AM OPPOSED to clean cutting. Clear cutting destroys the lay of the land, allows for erosion, mud slides and increased flooding all of which cause a financial and emotions hardship on the community. To top the receding problems with clear cutting, it reduces the amount of oxygen produced in the area become a health risk. Clear cutting destroys homes for animals forcing them into human living space causing a risk to the life of the animal and the humans.

Such GROSS destruction takes way too many years to recover from the economic and heath risk to the community.

I could favor a plan to selective cut.
