I own property on Osborne Creek and I am concerned about the affects logging the mountain will have on my property as far as flooding and slides. I am also concerned about the damage that logging will do to the wildlife and endangered species that live in the forest and creeks. It seems like a big risk that should be avoided at all cost. I am against logging but if it has to be done I am hoping you choose the least evasive one.

Thank you for taking the time to read my comment.
