Comments: My question and a really good friend of mine's is if you want to do studies on the land why don't you use the places you have already clear cutted and leave our woods alone which we hunt camp ride four wheel and horseback on. When you cut the timber off that many acres you're gonna have floods and when roots rotten you will have land slides our wildlife will be in danger cause it's home to all kinds of wildlife some in which is on the distinct list my opinion is let the wildlife and country people which consider that to be their home keep it thanks for letting me voice my and my friends opinion hope you consider leaving it and try a different way
