First name: Curtis

Last name: Dunlap

Organization:

Title:

Comments: I see no upside at all by allowing this mining. The skilled workers will come from outside Santa Cruz county. The profits go to a corporation outside Santa Cruz county.

We are left with negative impacts to water quality and quantity; scenery; threats and endangerment to species and their habitats; the effects from drilling and mining activities such as noise and lights used for nighttime drilling; increased traffic; wear and tear to roads and highways that we will have to pay for; and impacts to air quality. In-depth studies of the water quality and quantity, traffic, and potential health impacts must be taken.
